

Feed Premixes, Feed Additives and Disinfectants

Mineral/Vitamin and Amino Acid deficiencies in all types of animal can and will result in severe nutritional disorders such as retarded growth rates, anaemia, poor fertility, dermatitis, diarrhoea, rickets, weakness, loss of appetite and in severe cases mortality. It is imperative livestock receive a balanced diet of minerals, vitamins and amino acids which come from a quality source and that have not deteriorated either in transport, storage or have been effected by temperature. We at Special T Products aim to produce feed, premixes and additives of the very highest quality which can be relied on to give farmers guaranteed results.
